Qolcom Network as a Service - Cloud

Secure managed mobility and Enterprise networking at a predictable monthly cost

Qolcom offers organisations turnkey IT network management services delivered with a pay-as-you-go model. This allows organisations to move from a CAPEX model to a more predictable service experience and an OPEX-based consumption model.

As organisations look for more efficient ways to utilise IT resources to meet growing mobile, BYOD and IoT expectations, many are opting to outsource their applications, security and networking needs.

Cloud managed networks allow organisations with limited internal IT resources or know how to offload the deployment, management and monitoring of their network to Qolcom.

Qolcom Network as a Service - The timing is right.

With the move to more flexible pay as you go cloud-based services, you can get:

> Peace of mind by lowering your risk of business disruptions and time to problem resolution.

> Better quality of service for critical business applications that rely on network performance and connectivity and are crucial for the continuity of your business operations.

> Time and resources back to focus on core competencies and business outcomes that are critical for your growth while also reducing your operational costs.

> A consumption model that provides flexibility and predictability.

> A way to keep pace as your business needs change.

Qolcom can simplify your network operations using Cloud based Network Management Platform capabilities and zero-touch setup, centralised management of APs, switches & SD-WAN Gateways, historical data reporting, PCI compliance, monitoring and troubleshooting.

Network Overview and Reporting

Using a single dashboard, Qolcom can monitor and observe trends on your network. This allows for faster reactive support by quickly isolating problems through simple workflows, granular detail and extensive search. Network management data is securely stored to create reports containing historical data which can be provided as needed.

Simplified Provisioning

Qolcom can simplify network set up and offload IT resources by directly shipping APs, Switches & SD-WAN Gateways to your sites where a non-technical person can simply unpack, power up and they would then receive their configuration automatically over the Internet.

Maintenance and Firmware Management

Qolcom can streamline and automate your network management while maintaining complete control of fully tested updates. We can perform one-click firmware updates or schedule specific updates, manage user accounts with different levels of access and simplify firmware management and configuration.

Flexible and simple payment process

Take the simplicity of Qolcom's Network as a Service solution even further. You can choose your preferred configuration of infrastructure, software and services. Complete a short, easy agreement and pay a predictable monthly subscription fee for a complete solution. Avoid the hassle of ownership.
You choose the term and at the end, return it and subscribe to a new solution.

A Customer's Story

Qolcom has deployed Network as a Service for a global leader in the fashion industry. Access Points, Switches and SD-WAN are supplied, pre-configured and enrolled into a Cloud Management system to provide the day-to-day management. Devices are delivered to the retail outlets, ready for immediate installation in over 30 locations throughout the UK

and Europe. In the event of the user encountering any issues then Qolcom is on hand 24x7 to assist, whether it be a simple user issue or a full device replacement. This full Network as a Service has allowed staff to focus on customer service and IT to focus on business initiatives rather than supporting the Network.

About Qolcom Qolcom is an award-winning global integrator of market leading mobility, networking & security solutions. Our goal is to deliver business transformation through digital innovation, improve the user experience, increase productivity and address the concerns our customers have around compliance, governance and risk.

Qolcom has an outstanding track record of designing, deploying and supporting digital transformational technology solutions for both the enterprise and public sector for more than a decade.
